

Conductive Grid Tape Excellent For Static Safe Areas

ESD Systems' Conductive Grid Tape is a beige polypropylene, three layer tape with a conductive grid middle layer. The grid pattern and ESD awareness symbols help alert recipients that packages contain ESD sensitive components and should be handled in an ESD safe work area. This tape is available in ½", 1", and 2" widths, making it useful for a variety of applications. Grid pattern tape is great for other applications where the generation of static electricity is of concern. The antistatic tape will generate less than 200 volts. Call customer service for a free sample or request Drawing #16075. Phone: 508-485-7390.

Announcing The New Dual Operator Continuous Monitor

Now includes Mounting Bracket and Two Remote Jacks!!!

ESD Systems' new Dual Operator Workstation Continuous Monitor, Item #41137, will continuously monitor two operators and a work surface with RTT $<10^8$ Ohms. Its reliable impedance system will not sound any false alarms. These monitors come with two remote jacks and a mounting bracket, which allows for mounting of the base unit at eye level. Each unit monitors two single wire wrist straps and a

grounded work surface. A work surface monitoring ground cord is also included. Request Tech Brief PS-2080 for more information.

Clear Dissipative Recyclable Bags Are A Cost Effective Alternative to Pink Poly

ESD Systems' new clear dissipative bags are a cost effective choice for packaging both moisture and chemically sensitive materials. These bags feature a laminated structure for excellent puncture resistance and proprietary multilayer construction with a heat sealable inner layer. Constructed

from dissipative non-tribocharging polypropylene, the bags are 100% recyclable. Request Drawing 32500.

copy, or would like to request additional copies for your colleagues, please fax, call, or e-mail customer service: service@esdsystems.com You can also view our catalog on our web site at www.esdsystems.com Ph.: 508-485-7390. Fax: 800-805-5665.

Sole Grounder Increases Contact Area Between Your **Foot and Floor Surface**

The new Sole Grounder from ESD Systems combines the features of both heel and toe grounders in one unit, thereby increasing the contact area of the foot with an ESD control floor surface. Item #24800 is available in three sizes to fit almost every user and is available with a 1 or 2-megohm resistor. This sole grounder is made of cross-linked tire grade rubber, which is more resilient and more wear resistant than other materials.

We're sure you'll love the features of this new grounder, and we encourage you to give them a try! Call customer service to receive a sample or request Drawing 24800. Phone: 508-485-7390. Fax: 800-805-5665.

The EOS/ESD 20th Annual Symposium will be held October 4th - 8th in Reno, Nevada. This Symposium is an excellent opportunity to learn from tutorials, technical papers, workshops, speakers, presentations, and exhibitors.

We encourage you to stop by the ESD Systems exhibit to learn more about our wide variety of Electrostatic Discharge Control products. This is a great opportunity to meet our ESD Systems team.

New Adjustable Elastic Wrist **Strap Kit Includes Right Angle Cord**

Stays Securely In Place - Will Not Accidentally Disconnect

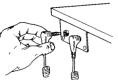

Our wide, soft elastic wrist strap provides extra comfort for the user. The wrist band has a standard stainless steel stud which improves the mechanical connection with the coil cord and lasts longer than metal stamped snaps.

Used in conjunction with the #13525 Dual Bench Mount, cords stay out of the way for improved worker productivity. In addition, under the bench mounting allows for quick disconnecting of the banana jack. With the Dual Bench Mount two people are able to ground wrist straps simultaneously and the coil cord will not obstruct the work area.

Request Tech Drawing #22005 for more information or call customer service for a sample. Phone: 508-485-7390.

Item	Description	Special Price 1-24*

New CD-ROM Training Series Includes Administrative Feature to Track Student's Progress

The ESD Control CD-ROM training series is designed to

help companies meet the ESD Association's guidelines and ISO 9000 requirements. This series covers manufacturing and service environments including clean rooms and high-voltage hazard areas. It also includes administrative software to track each student's progress and identifies areas where additional review is needed. #36061 allows individual self paced training, and typical training time is 45-90 minutes.

Course Outline:

- 1. Static Electricity Basics
- 2. Electrostatic Discharge Causes and Consequences
- 3. Generation of Static Electricity
- 4. Personal Grounding
- 5. Storage and Handling of ESD-Sensitive Components
- 6. ESD Protection at the Workstation and Field Service
- 7. Final Test

Item:	Description:	1-2	3-4	5+
36061	CD-ROM, PC Format	\$676.00	\$628.68	\$581.36

Call Customer Service for more information or request Tech Brief PS-36061. Phone: 508-485-7390. Fax: 800-805-5665.

A video training program is also available for training small or large groups. Request Information on item #36074.

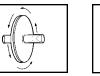

Forbo High Density Vinyl ESD Floor Tiles Are Independent of Room Temperature And Humidity

New high density, low plasticizer content tiles will not break and are resistant to heavy payloads and hard wheels. These tiles have permanent ESD properties due to a conductive veining which runs throughout the tile. A non directional pattern allows for easy installation of the 24" x 24" tiles. These tiles meet the requirements of ASTM F-150 and EOS/ESD.DS7.1, and meet clean room requirements to class 10. Forbo tiles are great for raised floor applications. and minimal maintenance is required. For more information, request Tech Brief TB-EL5000.

ESD Training Paddles Easily Generate High Static Voltages

Ideal For Demonstrating Electrostatic Principles

ESD Systems' training paddles are an excellent tool for training

employees, and demonstrating electrostatic principles. Among these are electric fields, field suppression, ionization, triboelectric generation, grounding, charge storage, capacitance, field induction, and electrical properties for both conductive and insulative materials.

This kit includes one acrylic and one aluminum paddle for optimum charge generation, both with insulative handles. The 6" paddles are to be used in conjunction with a static field meter, ionization test kit, or charged plate analyzer. Item #36080 is ideal for training, and

we encourage you to give them a try! For more information and experiments to perform with the paddles, request Tech Brief PS-2079.
